FINITE ELEMENT METHODS IN METEOROLOGICAL FLOWS

B. Neta and **I. M. Navon** vii Introduction

A. Staniforth and **J. Mailhot** 1 An operational model for regional weather forecasting

J. Steppeler 23 A Galerkin finite element–spectral weather forecast model in hybrid coordinates

C. A. J. Fletcher 31 Computational modelling of severe gradients with mass operator constructions

R. L. Lee and **J. M. Leone Jr** 41 A modified finite element model for mesoscale flows over complex terrain

E. S. Takle and **R. D. Russell** 57 Applications of the finite element method to modeling the atmospheric boundary layer

M. J. P. Cullen and **G. J. Shutts** 69 Numerical modelling of balanced atmospheric flow

Z. Zlatev and **R. Berkowicz** 93 Numerical treatment of large-scale air pollution models

B. Neta and **C. L. DeVito** 111 The transfer function analysis of various schemes for the two-dimensional shallow-water equations

M. Kawahara, T. Kodama and **M. Kinoshita** 139 Finite element method for tsunami wave propagation analysis considering the open boundary condition

P. C. Sinha and **A. K. Mitra** 153 Tidally induced residual circulation

R. Franke, E. Barker and **J. Goerss** 169 The use of observed data for the initial-value problem in numerical weather prediction

I Softstrip® data strip containing the table of contents of this issue

NUMBER 3

iii Softstrip® data strip containing the table of contents of this issue

M. Geppini and **F. Romani** 185 Automatic quadrature on Chebyshev points

I. Györi 195 Two approximation techniques for functional differential equations

B. Pourbabai 215 Tandem behavior of an $M/M/1/N \rightarrow G/M/1$ queuing system

D. H. Mugler and **R. A. Scott** 221 Fast Fourier transform method for partial differential equations, case study: the 2-D diffusion equation

P. J. Szabłowski 229 Optimal, recursive procedures of identification

J. C. Misra and **S. Roy** 247 Free and forced vibrations of the cranial vault: study of a mathematical model

267 Book Reports

Software Survey Section

J. C. Nash and **M. Walker-Smith** I Nonlinear parameter estimation

NUMBER 4

iii Softstrip® data strip containing the table of contents of this issue

K. N. A. Safwat and **B. D. Brademeyer** 269 Proof of global convergence of an efficient algorithm for predicting trip generation, trip distribution, modal split and traffic assignment simultaneously on large-scale networks

R. Manohar and **T. Y. Ngai** 279 Application of iteration functions to elliptic partial differential equations

P. Achuthan and **S. Sundar** 287 A new application of the extended Euclidean algorithm for matrix Padé approximants

C.-A. Wang 297 Buoyancy-induced flows in porous media

E. Zung and **J. Angeles** 307 Simulation of finite-dimensional linear dynamical systems using zero-order holds and numerical-stabilization methods

P. Góra and **A. Boyarsky** 321 Why computers like Lebesgue measure

D. Greenspan 331 Mechanisms of capillarity via supercomputer simulation

I. J. D. Craig and **A. D. Sneyd** 341 An alternating-direction implicit scheme for parabolic equations with mixed derivatives

CRYSTAL SYMMETRIES

Shubnikov Centennial Papers

I. Hargittai and **B. K. Vainshtein**	ix	Preface
B. K. Vainshtein	351	A. V. Shubnikov and his ideas in modern crystallography
A. V. Shubnikov✠	357	On the works of Pierre Curie on symmetry
A. V. Shubnikov✠	365	Symmetry of similarity
A. V. Shubnikov✠	373	Antisymmetry of textures
I. S. Zheludev	379	Space and time symmetry
H. Hauptman	385	The role of crystallographic symmetry in the direct methods of X-ray crystallography
J. Karle	397	Origin specification by use of phases
V. A. Koptsik	407	Generalized symmetry in crystal physics
P. Engel	425	Mathematical problems in modern crystallography
I. Tarján	437	Fruitful partnership. Cooperation with the Shubnikov Institute of the Soviet Academy of Sciences
L. A. Aslanov	443	Crystal symmetry and atomic interactions
V. P. Sakhnenko and **G. M. Chechin**	453	Symmetry methods and space group representations in the theory of phase transitions
E. Hartmann	465	Symmetry in an equilibrium position
K. Fichtner✠	469	Order–disorder structures
G. B. Bokiĭ	479	Theory of crystal symmetry upon the derivation of the 230 space groups
P. M. de Wolff	487	Definition of Niggli's lattice characters
V. Kopský	493	Towards a system in space group representations
E. Molnár	507	Minimal presentation of crystallographic groups by fundamental polyhedra
G. M. Chechin and **V. A. Koptsik**	521	Relation between multidimensional representations of the Fedorov groups and the groups of color symmetry
E. V. Chuprunov and **T. S. Kuntsevich**	537	*n*-Dimensional space groups and regular point systems

M. Senechal 545 Color symmetry

A. M. Zamorzaev 555 Generalized antisymmetry

N. L. Smirnova and **V. S. Urusov** 563 Fundamental law of crystal chemistry by Shubnikov, its applications and restrictions

B. B. Zvyagin 569 Polytypism of crystal structures

I. I. Shafranovskii and **G. I. Shafranovskii** 593 The law of correlation of symmetry and statistics in the mineral world

S. V. Rudnev 597 Application of elliptic Riemannian geometry to problems of crystallography

Gy. Rontó, K. Tóth, L. A. Feigin, D. I. Svergun and **A. T. Dembo** 617 Symmetry and structure of bacteriophage T7

A. Rockenbauer 629 Invariance and the uncertainty principle in EPR spectroscopy of crystals and liquids

B. N. Grechushnikov and **A. F. Konstantinova** 637 Crystal optics of absorbing and gyrotropic media

E. N. Ovchinnikova and **R. N. Kuz'min** 657 Symmetry in the nuclear solid state physics

I. Hargittai 663 Symmetries in Moscow and Leningrad

I Softstrip® data strip containing the table of contents of this issue

iii Softstrip® data strip containing the table of contents of this issue

S. V. R. Rao and **J. A. Rasmussen** 671 Stochastic models in water resource engineering utilizing micro-computers

S. V. R. Rao and **J. A. Rasmussen** 677 Micro-computer applications in water resource engineering

J. S. H. Tsai, L. S. Shieh and **T. T. C. Shen** 683 Block power method for computing solvents and spectral factors of matrix polynomials

G. Molnárka and **B. Ráczkevi** 701 Implicit single step methods by spline-like functions for solution of ordinary differential equations

N. K. Jha and **M. B. Vora** 705 A *t*-unidirectional error-detecting systematic code

T.-C. Huang, J.-F. Wang, C.-S. Yang and **J.-Y. Lee** — 715 The number of spanning trees of the generalized Boolean *n*-cube network

S. A. Hannaby — 727 A mapping method for mesh generation

J. A. Snyman and **M. van Rooyen** — 737 A conjugate direction gradient method with reconnaissance steps for unconstrained minimization

T. F. Lemczyk and **M. M. Yovanovich** — 747 Efficient evaluation of incomplete elliptic integrals and functions

N. Bellomo, L. M. de Socio and **R. Monaco** — 759 Random heat equation: solutions by the stochastic adaptive interpolation method
